

PRACTICAL FILLING. HIGH EFFICIENCY.

# LogWIN2 EDEL

STABLE WARMTH THAT DOES  
WHAT WOOD PROMISES.

## FLEXIBLE ASSEMBLY.

Maximum flexibility during installation due to infinitely rotatable flue gas connection.

## EASY TO INSTALL.

Electronics and hydraulics for buffer loading are pre-assembled and tested, which considerably easier to install.

## EFFICIENT FUEL UTILISATION.

The high level of efficiency ensures optimum fuel utilisation - less wood consumption with maximum output.

## PROVEN TECHNOLOGY. NATURAL WARMTH.

With the LogWIN2 EDEL, heating with logs arrives in the 21st century. Innovative technology makes the domestic fuel into an efficiency champion. The optimised combustion technology ensures a high energy yield and low emissions. The intuitive touch display enables simple operation, while automatic ignition (optional) via app increases heating convenience.

### Solid combustion chamber

The extremely durable combustion chamber is not a wearing part – no replacement, no additional costs, no worries. Maximum reliability for long-lasting, worry-free heating.

### Comfortable ignition (optional)

The automatic ignition can be conveniently controlled remotely via app and thus ensures optimum comfort and cosy warmth at all times.

### Large filling space

The generous filling chamber ensures long refilling intervals, while the XL filling opening makes it easier to load with logs particularly convenient.

**LOG WOOD –  
ECONOMICAL.  
NATURAL.  
REGIONAL.**

**RENEWABLE RAW MATERIAL** Wood is CO<sub>2</sub>-neutral and in balance with the environment.

**DOMESTIC SECURITY OF SUPPLY** Regional Forestry minimises dependence on imports.

**STABLE HEATING COSTS** Logs are independent of the fossil fuels and has price advantages.
